This documentation is the latest Nexway product documentation release. Please contact Nexway to get access to previous documentation.

Nexway Connect Guide

Nexway Connect provides a standard interface for collecting product catalog data (Product Feed) and for managing purchase orders (REST API). Nexway manages the complexity of the business relationship with the Publisher and the End-user product fulfillment. Nexway Connect makes it possible to sell thousands of software products and video games in a digital store.

Foreword

Terminology

Introducing Nexway Connect

Configuring your product feed

- Step 1: Define a product feed format
- Step 2: Define a product List
- Step 3: Test your product feed
